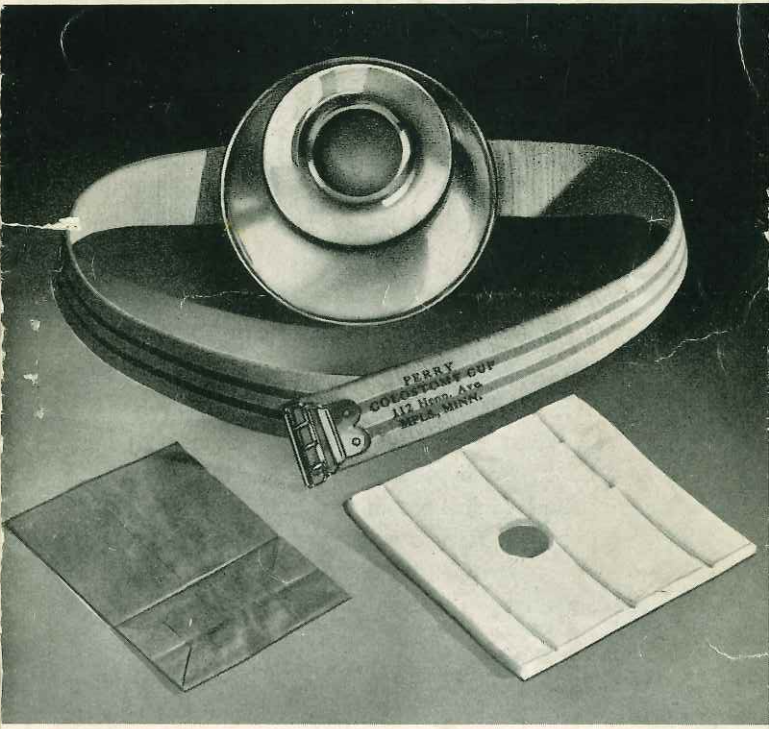
The PERRY *All Metal* COLOSTOMY CUP



PAT. PENDING

SAFE • SANITARY • COMFORTABLE
ALL METAL • NON-CORROSIVE • NO RUBBER PARTS • DISPOSABLE INNER LINER BAG • STERILIZES EASILY • BOILS

Special Features Which Add to Comfort, Convenience and Sanitation

PERRY COLOSTOMY CUPS are made of two non-corrosive metals—Pure Nickel and Stainless Steel. It has a sediment bowl below the Colostomy, allowing the bowl passage to drop down from the Colostomy. This keeps the skin clean—eliminates irritation. Once the passage is in the bowl, it cannot leak.

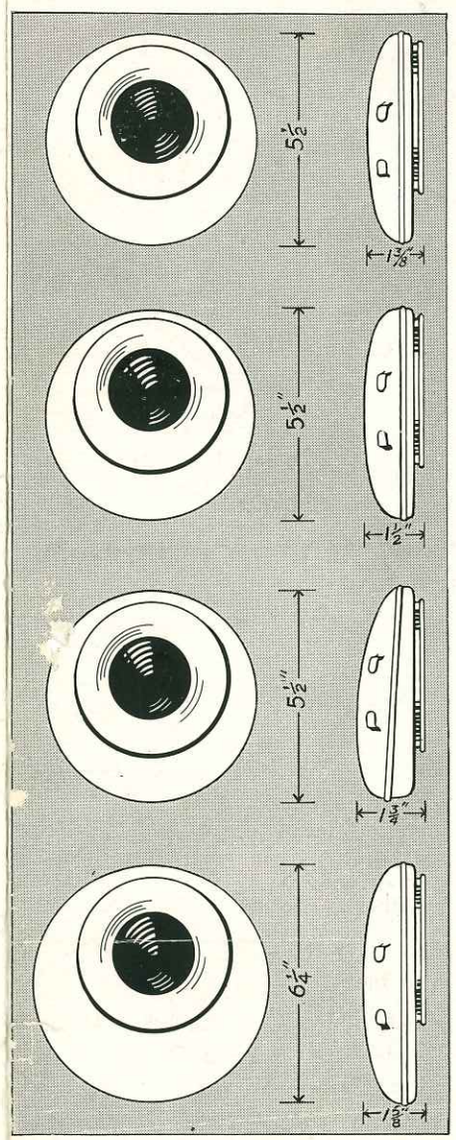
HOOK-ON METHOD ADDS TO COMFORT AND CONVENIENCE—Four flat hooks on the sides of the cup through which the belt passes will be noticed in the illustration. This hook-on method makes removal and attaching of the cup easy without unhooking or unbuckling the belt. It also allows free movement of the body without discomfort. The belt does not pull the cup out of place—instead, it slides back and forth, through the hooks, leaving the cup undisturbed.

EASILY STERILIZED—The cup is very easily sterilized. It is all metal, with no rubber parts, and can be scalded or boiled without damaging the cup.

DISPOSABLE PAPER BAG INNER LINER—This is a wonderful feature—one that is greatly appreciated by every user, because it adds so much to the convenience in cleaning and sanitation. In fact, only Colostomy patients who have actually experienced caring for a Colostomy can fully appreciate the convenience and value of this inner liner bag. The bag is held in place by the lid of the cup.

LID OF CUP WITH OPENING TO FIT—It holds the paper bag in proper place around the mouth of the cup. It also provides a broad bearing surface close up around the Colostomy, giving great comfort and support to the tender tissues. Lids are made with various size openings, both in round and oblong, enabling a proper fit for all. Clearance between the lid opening and the Colostomy should be approximately 5/16".

CELLULOSE PAD PREVENTS VACUUM — ADDS TO COMFORT AND SANITATION—This is a 15-pl... Cel...



SMALL—This size is used by small men and women up to 100 lbs. for both mid-line or side colostomies.

MEDIUM — This size is used by people from 100 lbs. to 160 lbs. for both mid-line or side colostomies.

LARGE—This cup has the same capacity as the large thin model but its smaller diameter makes it best suited for people over 160 lbs. having colostomy on the side.

LARGE THIN MODEL—This model is best suited for people weighing from 160 to 200 lbs. having a mid-line colostomy.

The above cups are all regular sizes carried in stock at factory.

THE CUP LIDS

Lids for the above cups are available in four different size openings ... lids are interchangeable on all cups.

TO BE SURE OF CORRECT FIT CUPS ARE MADE IN FOUR REGULAR SIZES (And on Special Order) . . .

Experience has proven that different size cups with different size lid openings are very necessary to obtain a correct fitting on people of varied weights with different types and locations of Colostomy.

With the illustrated sizes it is easy to obtain a perfect fit for nearly all users.

Either of four different lids are available for each size of cup, all with different size openings, ranging in size as follows: 2" and 2¼" round openings; 2" x 3" and 2" x 3¼" oblong openings for Double Colostomies. Lids are interchangeable on all cups.

FOR PROPER FITTING, give the following information:

Your normal weight.

Your normal waist measure.

Style of Colostomy—single or double—and its actual diameter; also its location from the navel.

All this information is very necessary to receive the proper size cup fitted with the proper lid opening.

The Cellulose Pad should be worn with the creped waterproofed side next to the body.

The complete outfit consists of one cup; one lid; one 1¾" elastic belt; 36 Cellulose Pads; and 50 inner liner bags.

Price per outfit.....$15.00

GUARANTEE

PERRY COLOSTOMY CUPS are a high-grade, proven product, made of high-grade materials—pure nickel and stainless steel—built for comfort, sanitation and a lifetime service.

If you are not satisfied after ten (10) days' trial, the purchase price will be refunded.

MUPLE PERRY

DESIGNED BY AN ACTUAL USER•••

TO WHOM IT MAY CONCERN:

I have a permanent Colostomy and I have tried various appliances, but with little success. Having a mechanical turn of mind, I developed one of my own ideas for my own personal use.

The result is a non-corrosive, all metal cup that is easily kept sterile, designed with a leak-proof sediment bowl. It is lined with a disposable paper bag which is held in proper place by the lid of the cup. There is a cellulose pad worn between the cup and the body. The cup is held in place by a high-grade 1¾" elastic belt—can also be worn under an abdominal belt.

Now I am perfectly comfortable and safe at all times. I am never embarrassed by my condition. When my doctors saw what I had developed, they wanted me to manufacture them so they could recommend them to their other Colostomy patients. I make them in four regular sizes and to special order.

It is a great pleasure to me to show my Colostomy Cups to the medical profession, due to the nice compliments on design and workmanship I receive. Most of my cups are sold on the Doctor's recommendation.

My greatest pleasure is to be able to furnish Colostomy patients with a high-grade product that is built for comfort, sanitation and a life-time service.

Respectfully,

Murle Perry.

HERE IS WHAT ACTUAL USERS SAY

Mr. M. Perry,
Minneapolis, Minnesota.
Dear Mr. Perry:
I am writing you in regard to satisfaction of using your cup for over a year. I certainly want to thank you for what you have done for people who have to wear something of this kind.
I have no trouble in wearing it at all. In fact, most of the time I forget I ever have your cup on and from the standpoint of comfort, sanitation and appearance, it would be hard to improve.
Thanking you again, I remain,

Sincerely yours,
DR. PETERSON

Mr. M. Perry,
Minneapolis, Minnesota.
Dear Mr. Perry:
I have tried various colostomy appliances but none of them compares with your Colostomy Cup, it is far more sanitary and so easy kept sterile. The dispensable inner-liner is a wonderful feature, one every user will appreciate.
It is comfortable to wear, and I feel absolutely safe at all times. You will remember I bought two of your cups, the medium and large. They are both O. K. but depending on my condition, at times I feel more safe with the large size.
I don't know what more a person could wish for in a Colostomy appliance, and, Mr. Perry, you deserve a lot of credit for the clever design of your Colostomy Cup. Wishing you health and success, I remain, Very truly yours,
IVER WOLLUM.

Mr. M. Perry,
Minneapolis, Minnesota.
Dear Mr. Perry:
Your metal cup is surely more sanitary and satisfactory in many ways than any appliance I have worn in the past three years, and I have worn a good many.

No embarrassing bad odors as I have always experienced in the past. The all metal construction and dispensable inner-liner bag makes it so sanitary and easy kept sterile.

I would not take $100.00 for my Perry Colostomy Cup if I could not get another one. I am glad to recommend your cup to any one, as I believe you have a superior product.

Yours truly,
FRED L. HOLMBERG.

Mr. M. Perry,
Minneapolis, Minnesota.
Dear Mr. Perry:
I have been a user of the Perry Colostomy Cup for nearly a year and am so glad to tell others how very satisfactory it has been, especially so in regard to convenience and sanitation.
I also want to tell of the courteous service I have always received. Mr. Perry does all in his power to make his customers entirely satisfied with his product before buying.

Very truly yours,
MONROE TODD.
